

## About the Fund

### Evergreen Platform

MaxCap has established an evergreen platform, the MaxCap Investment Trust ("MIT"), offering investors ongoing access to the Australasian Commercial Real Estate Debt ("CRED") asset class. The fund benefits from low volatility and provides an inflation hedge, making it an attractive allocation within any well-diversified portfolio.

### Transparent and Aligned Fee Structure

MaxCap offers a fair and transparent sharing of borrower fees, promoting alignment between MaxCap and investors. Fees charged to the borrower will be split equally between the Manager and the Fund, lowering your overall fee load and increasing your return.

### Flexibility and Liquidity

Investors are able to access liquidity on an ongoing basis, providing flexibility regarding commitment periods.

### Two Product Options

Investors can choose from two product options, First Mortgage or High Yield, depending on their preferred risk appetite and investment goals.

### Strong Net Returns

The First Mortgage and High Yield products target net returns of 5% and 8% respectively above the RBA cash rate net of fees.

### Diversified Pool

Investors gain immediate exposure to an established and diversified portfolio of high-quality CRED exposures, and the quarterly income distributions these generate.

### Prudent Management

Portfolio construction guidelines on geographies, sponsors and loan types ensure the portfolio is well-diversified, with market conditions appropriately considered.
